Quiz #1, 8/26Math 157 (Calculus II), Fall 2025

Problem 1 is worth 5 points, and Problem 2 is worth 5 points, for a total of 10 points. Remember to $show\ your\ work$ on all problems!

1. Compute the area between the curves y=x and $y=x^5$ from x=-1 to x=1. (Hint: sketch a picture of the curves.)

2. Compute the volume of the solid obtained by rotating the region under the curve $y=x^2$ from x=1 to x=2 about the x-axis.
